

Indian Ocean climate. symposium

9 – 9.15am	Welcome to CSIRO and opening remarks by International CLIVAR Project Office and the IOC
9.15 – 10am	Intra-seasonal prediction – Peter Webster
10 – 10.45am	Mean and variability of air-sea heat fluxes – Lisan Yu
10.45 – 11.15am	Morning tea and coffee
11.15 – 12noon	Deep mixing and the surface heat budget – Stuart Godfrey
12.00-12.45	West Australian Indian Ocean Climate Initiative – Neville Nicholls
12.45 – 2.15	Lunch
2.15 – 3pm	Ocean circulation variability and its climate relevance – Fritz Schott
3 – 3.45pm	Ocean modeling and its climate relevance – Jay McCreary

The international Indian Ocean Panel is meeting at CSIRO Marine Research from March 30 to April 2 to continue its coordination and planning for an Indian Ocean observing and monitoring network.

The meeting is sponsored by the World Climate Research Program's CLIVAR project on forecasting and the Intergovernmental Oceanographic Commission's Global Ocean Observing System.

As part of the Panel's second meeting, six of the world's leading researchers on the role of the Indian Ocean in the climate system will present a series of lectures giving an overview, review and recent progress.

The lectures will be in the CSIRO Marine Research auditorium in Hobart on Wednesday 30 March 2005. All interested staff and colleagues are welcome.

Wednesday, March 30 – CSIRO Marine Research Auditorium
