GOOS Scientific Steering Committee (John Field, GSSC Chair)

The GOOS Scientific Steering Committee met for their 10th session in Seoul, Republic of Korea, from 13-16 March 2007. The meeting was preceded by a successful scientific workshop on coastal observations, regional models, and data management and assimilation, organized by the local host, the Korean Ocean Research and Development Institute (KORDI). The meeting focused on two main areas:

- coastal implementation, and
- advocacy and outreach, including the role of industry in GOOS.
